## FELIN NEWYDD HOUSE – THE PERFECT GAME SHOOTING RETREAT

Mid Wales presents outstanding opportunities for excellent shooting. We are very fortunate to live within perfect game shooting countryside – deep, narrow valleys, beautiful hills, well managed woodland and a good selection of very well run shoots.

We are able to organise large pheasant and partridge days or more informal rough shooting excursions. Duck flighting, walked up grouse on the Black Mountains, woodcock and snipe are all possible.

Felin Newydd is directly associated with The Tregoyd Shoot on the Tregoyd Estate where my grandfather and father have enjoyed many seasons.

In 2010 the shoot was taken over by Ben Brown of Hardwick Farms in Suffolk.

The shoot has been catapulted into the big league and now offers some of the most exciting and challenging shooting available in the UK.

We look after many groups throughout the shooting season. The house is proving to be the ideal complement for a great day's shooting.

We can arrange the catering, menus and wines, and our staff will greet your guests. Should you require a butler one (or two) can be on hand to serve and organise the evening's libations.

Guns can be secured in the gunroom. Log fires and piping hot water not to mention the deep feather down duvets, toasted crumpets, freshly made Victoria sponge – the perfect environment to return to after being at the mercy of the elements.

For those who may be less appreciative of mud, wet dogs, musty tweed and the smell of cordite – not to mention the banter..... Felin Newydd is located only 15 minutes from the coffee shops and boutiques of Hay-on-Wye

“

*For sheer comfort and relaxation at Felin Newydd and the testing variety of birds in spectacular surroundings on the Tregoyd shoot, the Evans-Bevan's offer a matchless combination of sport and hospitality.*

*Whether staying at the house or simply taking a day and enjoying lunch in the cosy shoot lodge, this is as good as it gets anywhere in Wales.*

”
